The New York Metropolitan Transportation Council (NYMTC), an association of governments and transportation providers, is pleased to release the Q4 2006 brochure: **Travel Patterns in the New York Metropolitan Area**. This statistical information is updated and made public on a quarterly basis, and is designed to provide a glance at changing regional travel patterns.

The data were collected from the agencies responsible for operating each facility. In using these data, keep in mind that regional travel patterns may change for a variety of reasons, such as economic changes, service disruptions, construction, weather conditions or seasonal travel variations. It is difficult to isolate the exact reasons for the changing patterns, so these data should be used with caution.
