Rutgers CAIT UTC Overview

September 10 2025

(CAIT)

CAIT Regional Academic Partners & Collaborators >>

National USDOT UTC >>

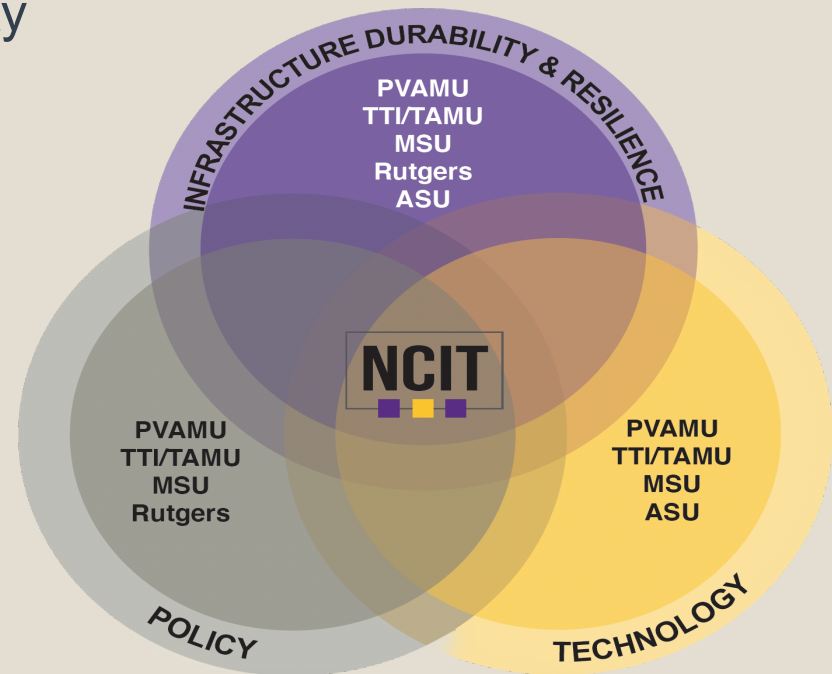

Effective 2023, CAIT has joined a National USDOT University Transportation Center (UTC) consortium focused on Improving the Durability and Extending the Life of Transportation Infrastructure.

Consortium Name: National Center for Infrastructure Transformation

Lead University: Prairie View A&M University

Consortium Members:

- Rutgers University
- Texas A&M University
- Arizona State University
- Blinn Community College
- Michigan State University

September 11th Memorial Program for Regional Transportation Planning

September 11th Memorial Program for Regional Transportation Planning

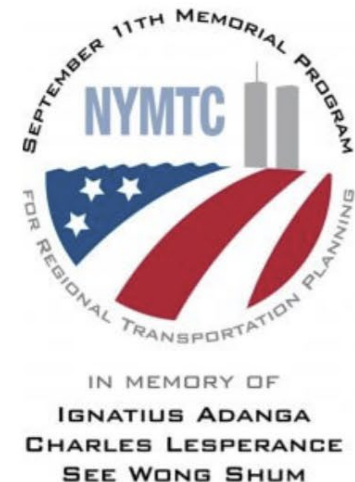

[Home](#) » [September 11th Memorial Program for Regional Transportation Planning](#)

The New York Metropolitan Transportation Council (NYMTC) established the September 11th Memorial Program for Regional Transportation Planning to honor the memory of Ignatius Adanga, Charles Lesperance, and See Wong Shum, the three employees it lost during the attack on the World Trade Center. The program was established to educate and motivate people interested in transportation technology and planning and to encourage innovations in planning activities throughout the NYMTC region; this year's program is administered by the [Center for Advanced Infrastructure and Transportation at Rutgers](#).

This program will foster the academic and professional development of students by providing them with opportunities to participate in innovative research or planning projects. The students will conduct research for twelve months in a professional assignment outside the classroom.

The student will conduct research under the guidance of a mentor from NYMTC or a NYMTC member agency. The research will challenge students to develop creative solutions to difficult problems, providing a benefit to the region while enhancing their educational experiences.

Under the full 12-month program, the student will commit the dedicated time outside the classroom to conduct research and submit the required research outputs. For this involvement, a graduate student will receive financial support up to \$35,000 over 12 months.
