

**NEW YORK METROPOLITAN
TRANSPORTATION COUNCIL**

**ANNUAL LISTING OF OBLIGATED
TRANSPORTATION IMPROVEMENT
PROJECTS**

for

Federal Fiscal Year 2020

December 28, 2020

Disclaimer

The preparation of this report has been financed through the U.S. Department of Transportation's Federal Transit Administration and Federal Highway Administration. This document is disseminated under the sponsorship of the New York Metropolitan Transportation Council (NYMTC) in the interest of information exchange. The contents of this report reflect the views of the authors who are responsible for the facts and accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the Federal Transit Administration, Federal Highway Administration or the State of New York. This report does not constitute a standard, specification or regulation. This report was funded through project PTCS20D00.B01, in NYMTC's State Fiscal Year 2020-2021 Unified Planning Work Program.

Title VI Notice to the Public

NYMTC is committed to compliance with Title VI of the Civil Rights Act of 1964, the Civil Rights Restoration Act of 1987, and all related rules and statutes. NYMTC assures that no person or group(s) of persons shall, on the grounds of race, color, age, disability, national origin, gender, or income status, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any and all programs, services, or activities administered by NYMTC, whether those programs and activities are federally funded or not. It is also the policy of NYMTC to ensure that all of its programs, policies, and other activities do not have disproportionate adverse effects on minority and low income populations. Additionally, NYMTC will provide meaningful access to services for persons with Limited English Proficiency.

Introduction

Every day, the New York City metropolitan region's transportation system is called upon to efficiently and reliably deliver people and goods to countless destinations within its region and beyond. This vast network of rails, roads, bridges, waterways and trails makes it possible for workers to get to jobs, students and teachers to educational institutions, and visitors to attractions, as well as for goods and services to reach consumers.

Transportation improvement projects are planned, programmed and executed on a regular and ongoing basis in order to maintain and improve this massive transportation system. For the portion of the system in the City of New York and the surrounding suburban counties of Putnam, Rockland, and Westchester in the lower Hudson Valley and Nassau and Suffolk on Long Island, over 1,600 such projects are currently contained in the regional Transportation Improvement Program, or TIP.

Federal Fiscal Year (FFY) 2020 was the first year of the NYMTC FFYs 2020-2024 Transportation Improvement Program (TIP), which was adopted by the New York Metropolitan Transportation Council (NYMTC) on September 5, 2019.

During each fiscal year, authorization for federal reimbursement from the Statewide TIP is requested for hundreds of programmed project phases from the NYMTC TIP. When authorization is given by federal oversight agencies, the *obligation* for the federal government to reimburse the project sponsor for authorized costs occurs for that phase of work.

How Are Transportation Improvement Projects Planned and Funded?

NYMTC is a regional council that is the Metropolitan Planning Organization (MPO) for New York City, suburban Long Island and the lower Hudson Valley. As an MPO, NYMTC is responsible for undertaking regional transportation planning activities for its planning area that lead to funding for the transportation improvement projects that keep the transportation system functioning.

The federal legislation which authorizes spending nationally for transportation improvements requires MPOs to follow a metropolitan transportation planning process in order to obtain federal funding. The foundation of this process is a long-range Regional Transportation Plan which defines the region's long-term needs and conceptual solutions. With the Plan as a framework, various specific transportation improvements are defined and their phases added to the TIP. As required by federal regulations, the TIP is a medium-range program of transportation improvement projects that covers a minimum of four years. NYMTC's adoption of the Plan and TIP for its planning area affirms that the transportation improvements it has planned and programmed are therefore eligible for federal funding.

How Are Transportation Projects Implemented?

Transportation improvement projects that are programmed on the TIP, whether they involve the purchase of vehicles or equipment, construction or rehabilitation of facilities or the eligible provision of services, are defined by the various phases they must move through as they are developed and implemented. These phases usually include Preliminary Engineering (scoping, preliminary and final design or specification), ROW (Right of Way), CONST (construction or procurement, and construction inspection) or MISC (Miscellaneous). Often, these phases are scheduled over a period of several years. Two additional phases were added in consultation with the federal agencies, DESCONST (design construct) and VEHEQUIP (Vehicle Equipment) for this year's report.

Once a project has been programmed by NYMTC on the TIP, funding for each of its phases must then be *obligated*. Obligation of funding is a formal federal commitment to reimburse a specific amount of funds for a project phase of work. In contrast, the programming of funds on the TIP simply enables this eventual commitment. Obligation begins the flow of federal funds to a project. Funding administered by the Federal Highway Administration (FHWA) is obligated to projects and/or their phases, while funding administered by the Federal Transit Administration (FTA) is *awarded* to projects and/or their phases through a grant process. Grant award is a different form of obligation. Funding obligation is a critical milestone in the implementation process for transportation improvement projects.

Federal Reporting Requirements

Federal planning regulations require that NYMTC publish a listing of obligated projects at the conclusion of each calendar year showing the activity of the previous FFY which ended the previous September 30th. This *Annual Listing of Obligated Transportation Improvement Projects for FFY 2020*, which identifies obligations during the fiscal year which began on October 1, 2019 and ended on September 30, 2020, fulfills NYMTC's obligation under 23 CFR Part 450.334 as detailed below:

§ 450.334 Annual listing of obligated projects.

- (a) In metropolitan planning areas, on an annual basis, no later than ninety calendar days following the end of the program year, the State, public transportation operator(s), and the MPO shall cooperatively develop a listing of projects (including investments in pedestrian walkways and bicycle transportation facilities) for which funds under 23 U.S.C. or 49 U.S.C. Chapter 53 were obligated in the preceding program year.
- (b) The listing shall be prepared in accordance with §450.314(a) and shall include all federally-funded projects authorized or revised to increase obligations in the preceding program year, and shall at a minimum include the TIP information under § 450.324(e)(1) and (4) and identify, for each project, the amount of federal funds requested in the TIP, the Federal funding that was obligated during the preceding year, and the federal funding remaining and available for subsequent years.

- (c) The listing shall be published or otherwise made available in accordance with the MPO's public participation criteria for the TIP.

This Annual Listing for FFY 2020 meets these requirements. Projects and/or project phases obligated during FFY 2020 are listed in subsequent portions of this report. Visualization that spatially displays the listed projects in ArcGIS Online can be accessed through the TIP section of NYMTC's website at www.nymtc.org.

How to Read the Annual Listing of Obligated Transportation Improvement Projects for FFY 2020

The Annual Listing is organized geographically by NYMTC's three main subregions: the lower Hudson Valley, New York City, and suburban Long Island.

The following is an explanation of terms that appears atop each column of the Annual Listing:

COUNTY – The county within which work for the project is authorized.

PIN – The unique project identification numbers used to track projects.

PROJECT DESCRIPTION – A brief single-line description of the project. A more comprehensive description can be obtained from the TIP.

PHASE – The phase in the project development process for which funds have been obligated.

PROJECT SPONSOR – The project sponsor represent the agency authorized to request obligation.

AMOUNT OBLIGATED FFY 2020 – The funding obligated within FFY 2020. A negative number in this field typically shows a project phase closing out, typically withdrawn or de-obligated.

AMOUNT PROGRAMMED IN FFY 2020 – The planned amount of funding programmed on the TIP for that phase in FFY 2020.

AMOUNT PROGRAMMED POST FFY 2020 – The federal funding programmed in subsequent fiscal years, which is 2021-2024 of the current TIP.

For the ArcGIS Online visualization of the listed obligated projects and/or project phases, the projects that can be spatially displayed have been filtered by the following categories:

- Obligated – projects and/or project phases that the federal government has made a legal commitment to reimburse eligible costs to the project sponsor.
- Not Obligated – projects and/or project phases programmed in FFY 2020 that have not received a federal commitment for reimbursement.
- Savings – project or project phases that are closed out (withdrawn or de-obligated) or have a reduction in cost affecting a project's obligation authority.

FFY 2020 Annual Listing of Obligated Projects
