

**NEW YORK METROPOLITAN
TRANSPORTATION COUNCIL**

**ANNUAL LISTING OF OBLIGATED
TRANSPORTATION IMPROVEMENT
PROJECTS**

for

Federal Fiscal Year 2013

December 27, 2012

The preparation of this report has been financed through the U.S. Department of Transportation's Federal Transit Administration and Federal Highway Administration. This document is disseminated under the sponsorship of the New York Metropolitan Transportation Council in the interest of information exchange. The contents of this report reflect the views of the authors who are responsible for the facts and accuracy of the data presented herein. The contents do not necessarily reflect the official views or policies of the Federal Transit Administration, Federal Highway Administration or the State of New York. This report does not constitute a standard, specification or regulation.

This report was funded through the New York Metropolitan Transportation Council project "2014-2015 Unified Planning Work Program Development, Transportation Improvement Program Maintenance (PTCS14D00.B01)." This project was funded through matching grants from the Federal Transit Administration and from the Federal Highway Administration.

Introduction

Every day, the New York metropolitan region's transportation system is called upon to efficiently and reliably deliver people and goods to countless destinations within the region and beyond. This vast network of rails, roads, bridges, waterways and trails makes it possible for workers to get to jobs, students and teachers to educational institutions, and visitors to attractions, as well as for goods and services to reach consumers.

Transportation improvement projects are planned and executed on a regular and on-going basis in order to maintain and improve this massive transportation system. For the portion of the system in the City of New York and the surrounding suburban counties of Putnam, Rockland, and Westchester in the lower Hudson Valley and Nassau and Suffolk on Long Island, an enormous program of over typically 2,000 such projects is in place. Federal Fiscal Year (FFY) 2013 closed out the previous FFY 2010-2014 Transportation Improvement Program as the current FFY 2014-2018 TIP was adopted September 4, 2013. During each fiscal year, a variety of these planned projects are advanced to implementation. The first step toward implementation involves the *obligation* of planned funding which effectively "locks in" the funding so that projects can be advanced.

How Are Transportation Improvement Projects Planned and Funded?

The New York Metropolitan Transportation Council (NYMTC) – a regional council of governments which is the Metropolitan Planning Organization (MPO) for New York City, Long Island and the lower Hudson Valley – is the organization responsible under federal law for undertaking regional transportation planning activities for its planning area that lead ultimately to transportation improvement projects that keep the transportation system functioning.

The federal legislation which authorizes spending nationally for transportation improvements requires metropolitan regions to follow a comprehensive planning process in order to obtain federal funding. The foundation of this process is a long-range Regional Transportation Plan which defines the region's long-term needs and conceptual solutions. Through more detailed study by NYMTC or its members, various specific transportation improvements are then defined using the Plan as a framework. Once defined, improvement projects are then added to the TIP. As required by federal regulations, the TIP is a medium-range program of transportation improvement projects over a four year period.

NYMTC's adoption of the Plan and TIP for its planning area affirms that its members are in compliance with federal planning requirements and that the transportation improvements it has planned are therefore eligible for federal funding.

How Are Projects Implemented?

Transportation improvement projects that appear on the TIP, whether they involve the purchase of equipment or construction of facilities or provision of services, are described by the various phases they must move through as they are developed and implemented. These phases range from preliminary design or specification to purchase, construction or implementation and finally

to evaluation, inspection and quality control. Often, these phases are scheduled over a period of several years.

Once a project has been programmed on the TIP, funding for each of its phases must then be *obligated*. Obligation of funds can be thought of as a formal commitment of a specific amount of funds to a project, as opposed to the programming of funds on the TIP, which simply enable their eventual commitment. Obligation begins the flow of funds to a project. Whereas Federal Highway Administration (FHWA) administered projects are obligated, Federal Transit Administration (FTA) administered projects are *awarded* through a grant process.

Funding obligation is a critical milestone in the process which eventually implements transportation improvement projects. Federal planning regulations require that NYMTC publish a listing of obligated projects at the conclusion of each FFY, which begin on October 1st and end the following September 30th.

Federal Reporting Requirements

The *Annual Listing of Obligated Transportation Improvement Projects* for FFY 2013 fulfills NYMTC's obligation under 49 CFR Part 450.332 for the fiscal year which ended on September 30, 2013. Specifically, these federal requirements are defined in the following sections of the Federal authorization legislation:

§ 450.332 Annual listing of obligated projects.

(b) The listing shall be prepared in accordance with § 450.314(a) and shall include all federally-funded projects authorized or revised to increase obligations in the preceding program year, and shall at a minimum include the TIP information under § 450.324(e)(1) and (4) and identify, for each project, the amount of federal funds requested in the TIP, the Federal funding that was obligated during the preceding year, and the federal funding remaining and available for subsequent years.

(c) The listing shall be published or otherwise made available in accordance with the MPO's public participation criteria for the TIP.

§ 450.324 Development and content of the transportation improvement program (TIP).

(e) The TIP shall include, for each project or phase (e.g., preliminary engineering, environment/NEPA, right-of-way, design, or construction), the following:

(1) Sufficient descriptive material (i.e., type of work, termini, and length) to identify the project or phase;

(4) Identification of the agencies responsible for carrying out the project or phase.

The FFY 2013 listing meets these requirements. Projects obligated during FFY 2013 are listed in subsequent portions of this report. Maps have also been prepared spatially displaying the listed projects. These maps can be accessed through NYMTC's website at www.nymtc.org.

How to Read the FFY 2013 Annual Listing of Obligated Transportation Improvement Projects

The listing is organized geographically by NYMTC's three main subregions: the lower Hudson Valley, New York City, and Long Island. The listing is further subdivided by County.

The following is an explanation of terms that appears atop each column of the Annual List:

PIN – The unique project identification numbers used to track projects.

PROJECT DESCRIPTION – A brief single-line description of the project. A more comprehensive description can be obtained from the TIP.

OBLIGATION OR AWARD DATE – The date funding was authorized/obligated for FHWA administered projects or the date of the grant award for FTA administered projects.

ORIGINAL DATE – The date of authorization for FHWA advance-funding or TIP proposed date.

FEDERAL FUND SOURCE – The federal program from which funds are to be drawn. Appendix A of the TIP has further explanation of fund sources.

PHASE – The phase in the project development process for which funds had been obligated.

FED AMOUNT ON TIP FFY 2013 – The planned amount of funding programmed on the TIP for that phase in FFY 2013.

FEDERAL AMOUNT FOR FFY 2013 – The funding obligated (in millions). A negative number in this field typically shows a project phase closing out typically withdrawn or de-obligated.

ADVANCE AMOUNT END OF FFY 2013 – The funding advanced for a project which would lead to future obligations. This is the remaining amount advanced at the end of the fiscal year.

ADVANCE AMOUNT END OF FFY 2012 – The funding advanced for a project at the start of FFY 2013.

FEDERAL AMOUNT 2014-2018 – The federal funding programmed in subsequent fiscal years which is 2014-2018 of the current TIP.

LEAD AGENCY – The agency responsible for carrying out the project or phase.
